The newest addition to the Quark Expeditions fleet is the largest, most sophisticated and powerful ice breaker ever constructed. Twenty years in the making, *50 Years of Victory* is the first Arktika-class ice breaker to have a spoon-shaped bow. Boosting the efficiency is the all-new automated digital control system. The ship, designed with a stainless steel ice belt 5 metres (16 feet) wide, breaks through ice up to 2.5 metres (8.2 feet) thick. The ice breaker is driven by 2 nuclear reactors that produce 75,000 horsepower.
